Housing Management System

- For Check-In we have to different Views:
 - One to enter the Credit Card Information
 - One to enter the Debit Card information
 - The GUI will automaticly change depended on what you choose in the combobox
- To Check-In a new person you must first select a room
- Then enter the personal data and the payment information
- Hit the safe button
- Attention there is no undo function. So once you hit safe you firstz need to check-out the person again and then reenter the data

Housing Managment System

Check-Out

- To check-out a person you just select the room in the tree and press the check-out button
- Attention no undo of this function is possible
