Housing Managment System

- For Check-In we have two different Views:

  - One to enter the Credit Card Information

  - One to enter the Debit Card information

  - The GUI will automaticly change depended on what you choose in the combobox

- To Check-In a new person you must first select a room

- Then enter the personal data and the payment information

- Hit the safe button

- Attention there is no undo function. So once you hit safe you first need to check-out the

  person again and then reenter the data
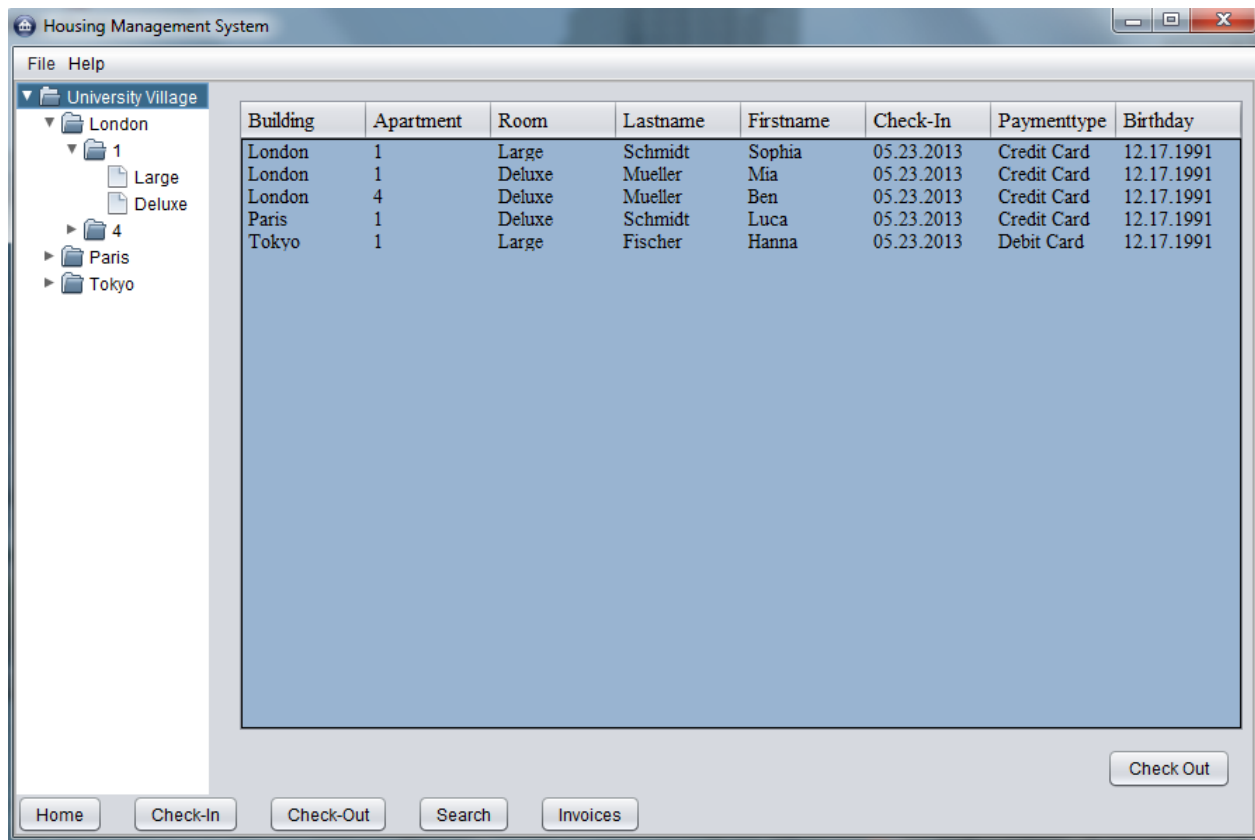

Check-Out

- To check-out a person you just select the room in the tree and press the check-out

  button

- Attention no undo of this function is possible

Housing Managment System

Search

- To search for a person just start to enter his last name in the text field and the person

  will appear in the table below

Housing Managment System

Invoices

- To print an invoice select the invoice in the table and press the print button
